# STRENGTHENING OF THE CLUSTER/ EDUCATION SECTOR AND LOCAL COORDINATION MECHANISM FOR PLANNING, IMPLEMENTATION AND MONITORING OF THE SECTOR RESPONSE TO EMERGENCIES

## Context

There is a constant demand for updated information to evaluate access, permanence and quality of educational services in Colombia. Unfortunately, most indicators are aggregated at the departmental or municipal level, without the possibility of disaggregating data by educational institution or with higher levels of disaggregation by gender and differential approach. In addition, some data are not collected every year, but are estimated figures based on national censuses or surveys, or secondary information.

In view of the above, it is worth mentioning that in this order of ideas and due to the double/triple affectation or multi-threat scenarios of humanitarian conditions derived from natural and socio-natural phenomena, migration, armed conflict and generalized violence, it is necessary to continue coordinating and managing information for decision-making and defining response plans and accountability on the performance of the humanitarian structures present in the country.

## Background

The EeE Cluster and the Education Subsector of the GIFMM between August and December 2020 received support from 3iS for the management and administration of information, improving the available conditions of access and analysis of information; however, the challenges in the response and the urgency of articulated work are still present, which is why for this year and as a result of the diagnosis of capacities in the handling and management of cluster/sector information, as well as the results of the implementation of actions during this time, affirm the need for continuation. UNICEF is the cluster leader and has the responsibility to compile and unify cluster reports, share this information with relevant actors and donors. The lack of adequate data, knowledge and information management prevents the cluster from reaching the full potential of coordination on humanitarian issues and showing donors the reach of the cluster to its beneficiaries.

Donor: UNICEF

Current Project:

**Strengthening of the cluster/  
education sector and local  
coordination mechanism for  
planning, implementation  
and monitoring of the sector  
response to emergencies.**

Project duration:

July 1, 2022 - December 29, 2023

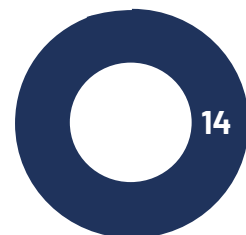

Main partner:

UNICEF

## Personnel

**Total personnel: 14**

- National
- International

---

## Objective

Contribute to the conditions of administration and information management that guarantee the access and permanence of the school-age population to the educational sector and the fulfillment of complete educational trajectories even in emergency situations of children, young people and adolescents in Colombia.

---

## Expected results

Strengthening the capacity of national and local coordination mechanisms for the management of education responses in emergencies.

The specific products in this project will be determined in the formulation of the work plan of each local UNICEF team, which in turn is inscribed in the actions of the Work Plan of the GIFMM Cluster and education subgroup, with the following results:

- Strategy to strengthen the flow of information and communication from local education clusters to the local humanitarian architecture and EeE/Education Cluster
- Plan to support dissemination of partner actions for ETPV implementation in schools.
- Analysis of the demand for education and the supply of formal education for migrant and host community children from the institutional framework and local and international cooperation
- Capacities and tools for planning, monitoring and accountability in response to emergencies caused by migration, conflict and natural disasters.
